

# H2R Layouts

# ATEM Animated SuperSource

## Pro pack

The ultimate reference guide

# You've downloaded, now what?

As you work your way through this PDF, make note of any IDs that you like. These will correspond to the XML file that you should look for in the “Macros” folder.

## How to macro?

If you haven't tried it already, importing macros to your ATEM Switcher is fairly straightforward, though you can always watch the video if you get stuck. [h2r.li/layouts-tutorial](https://h2r.li/layouts-tutorial)

## PDF vs final looks

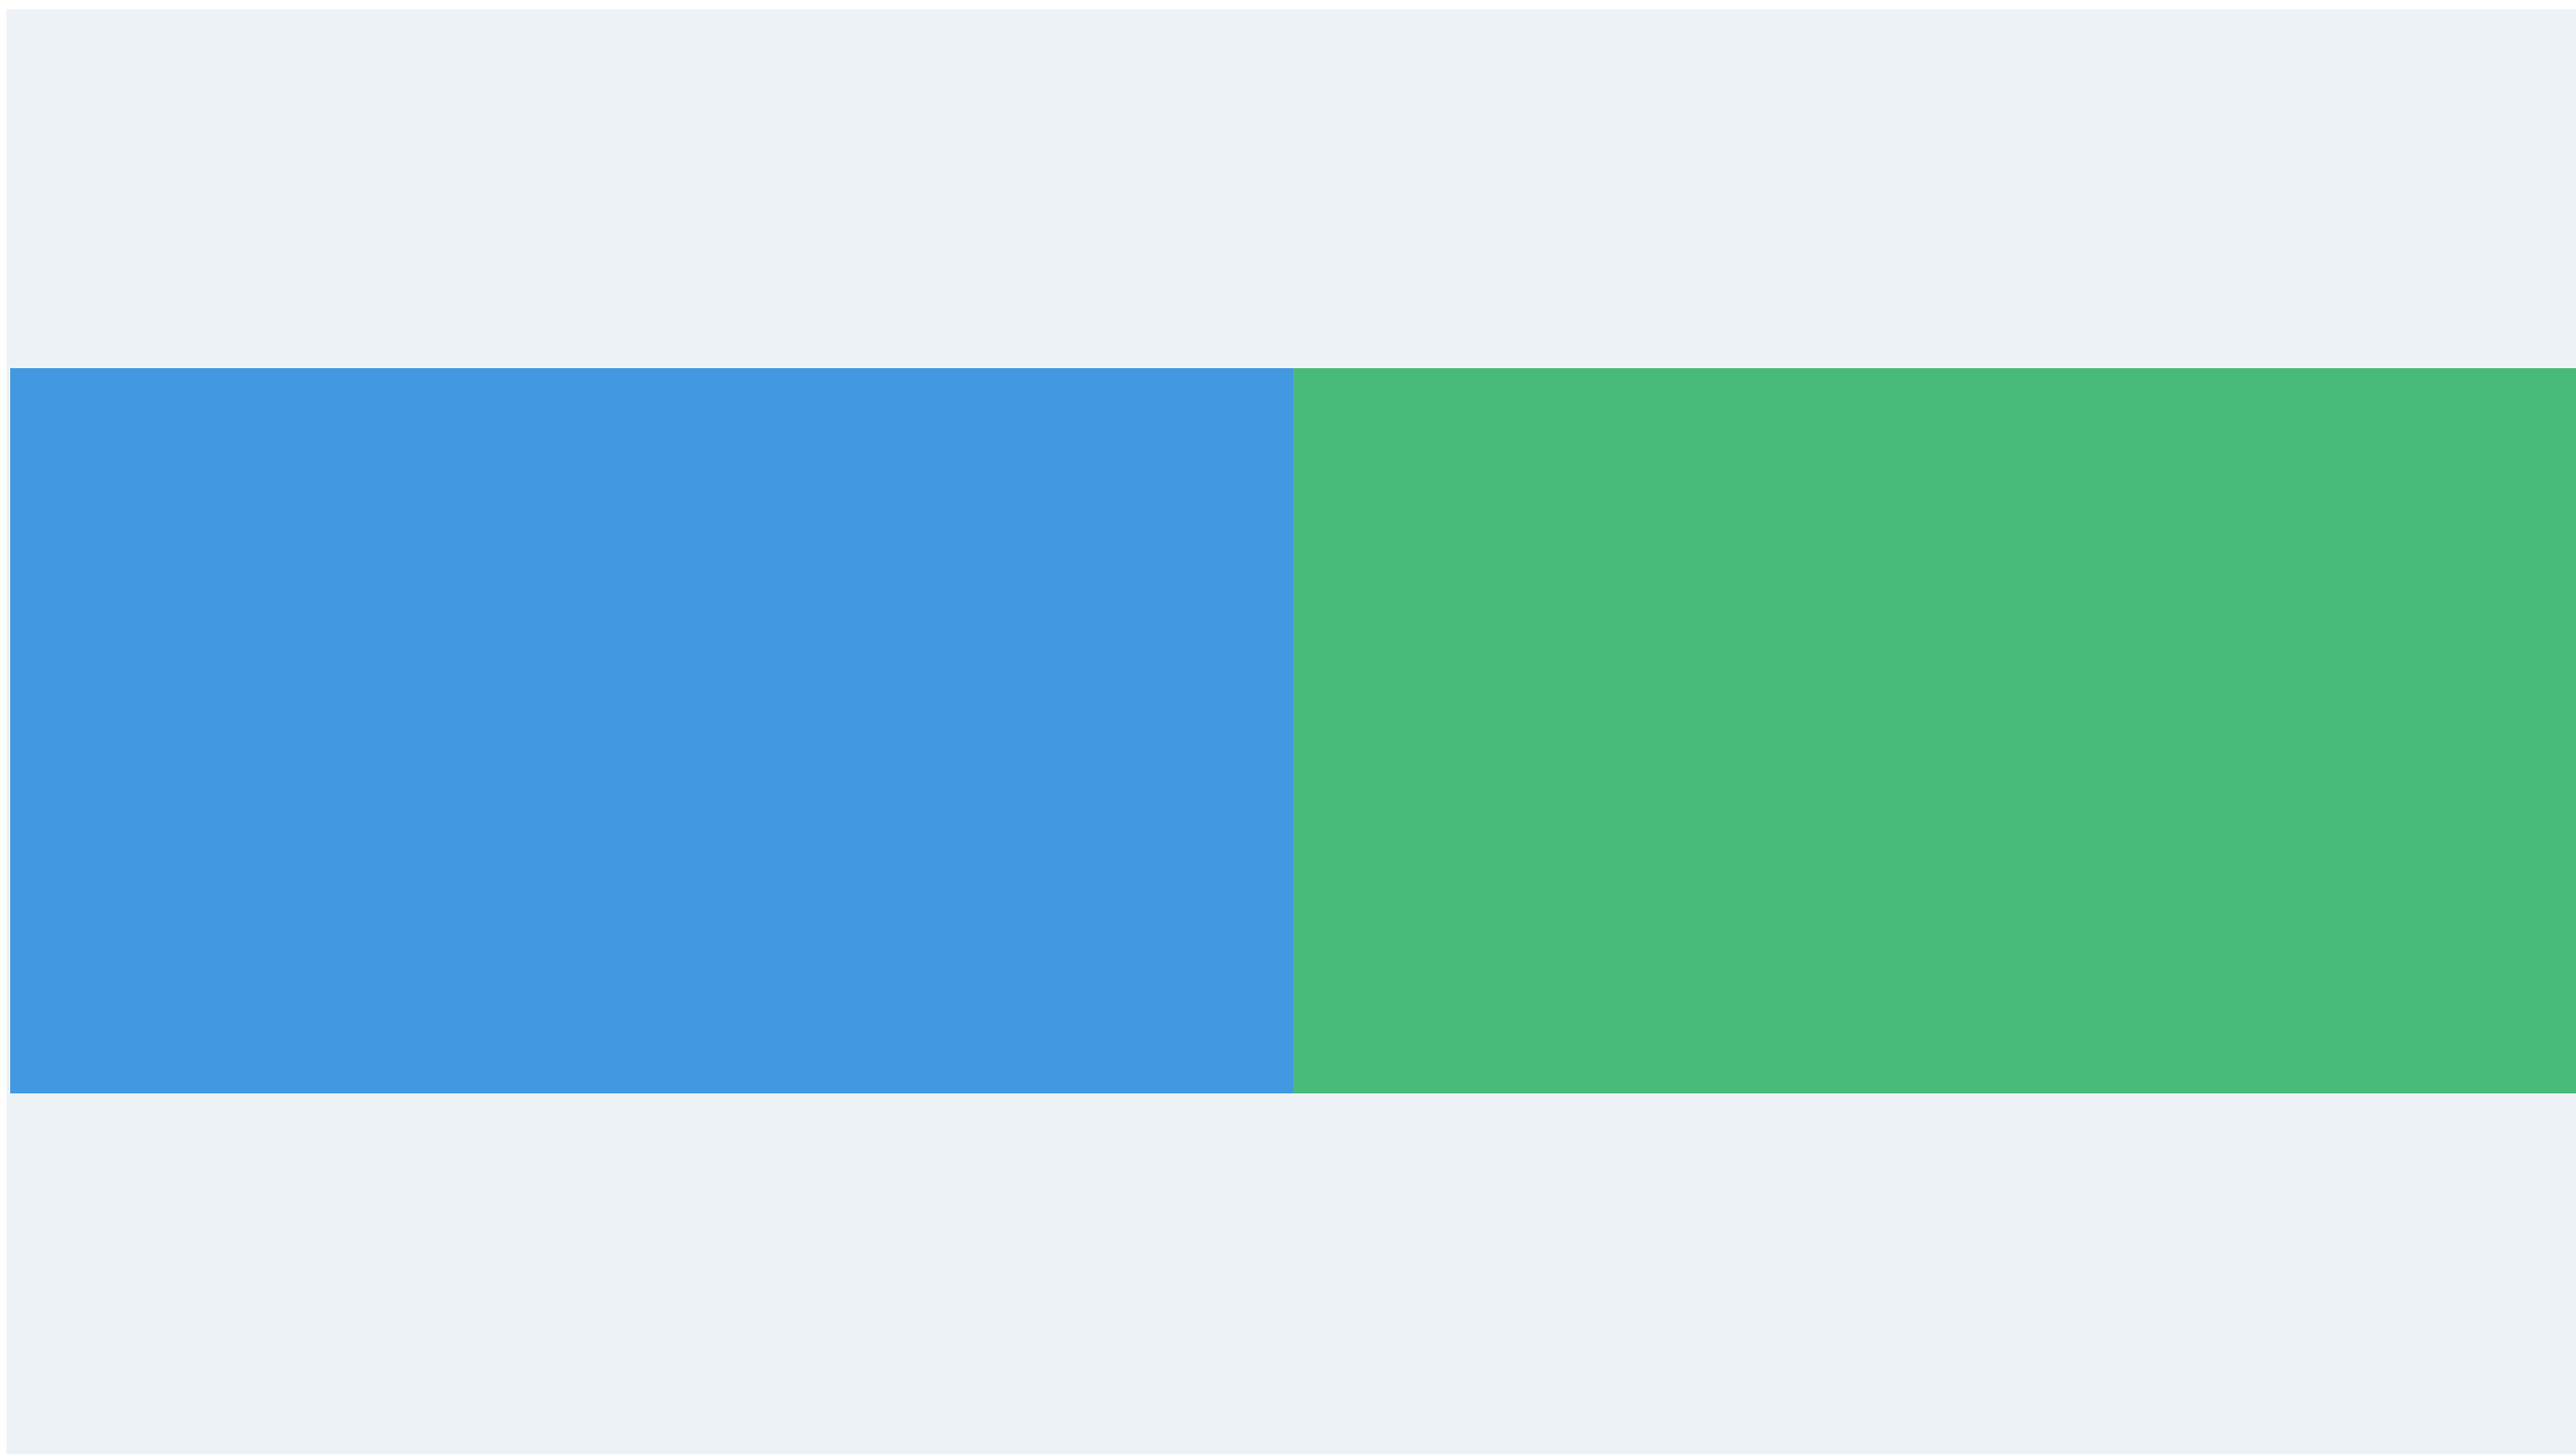

I have created this PDF in a design tool, then recreated all the layouts with H2R SuperSource Layouts. I have done my very best to keep the two consistent, but they may slightly vary.

## Issues

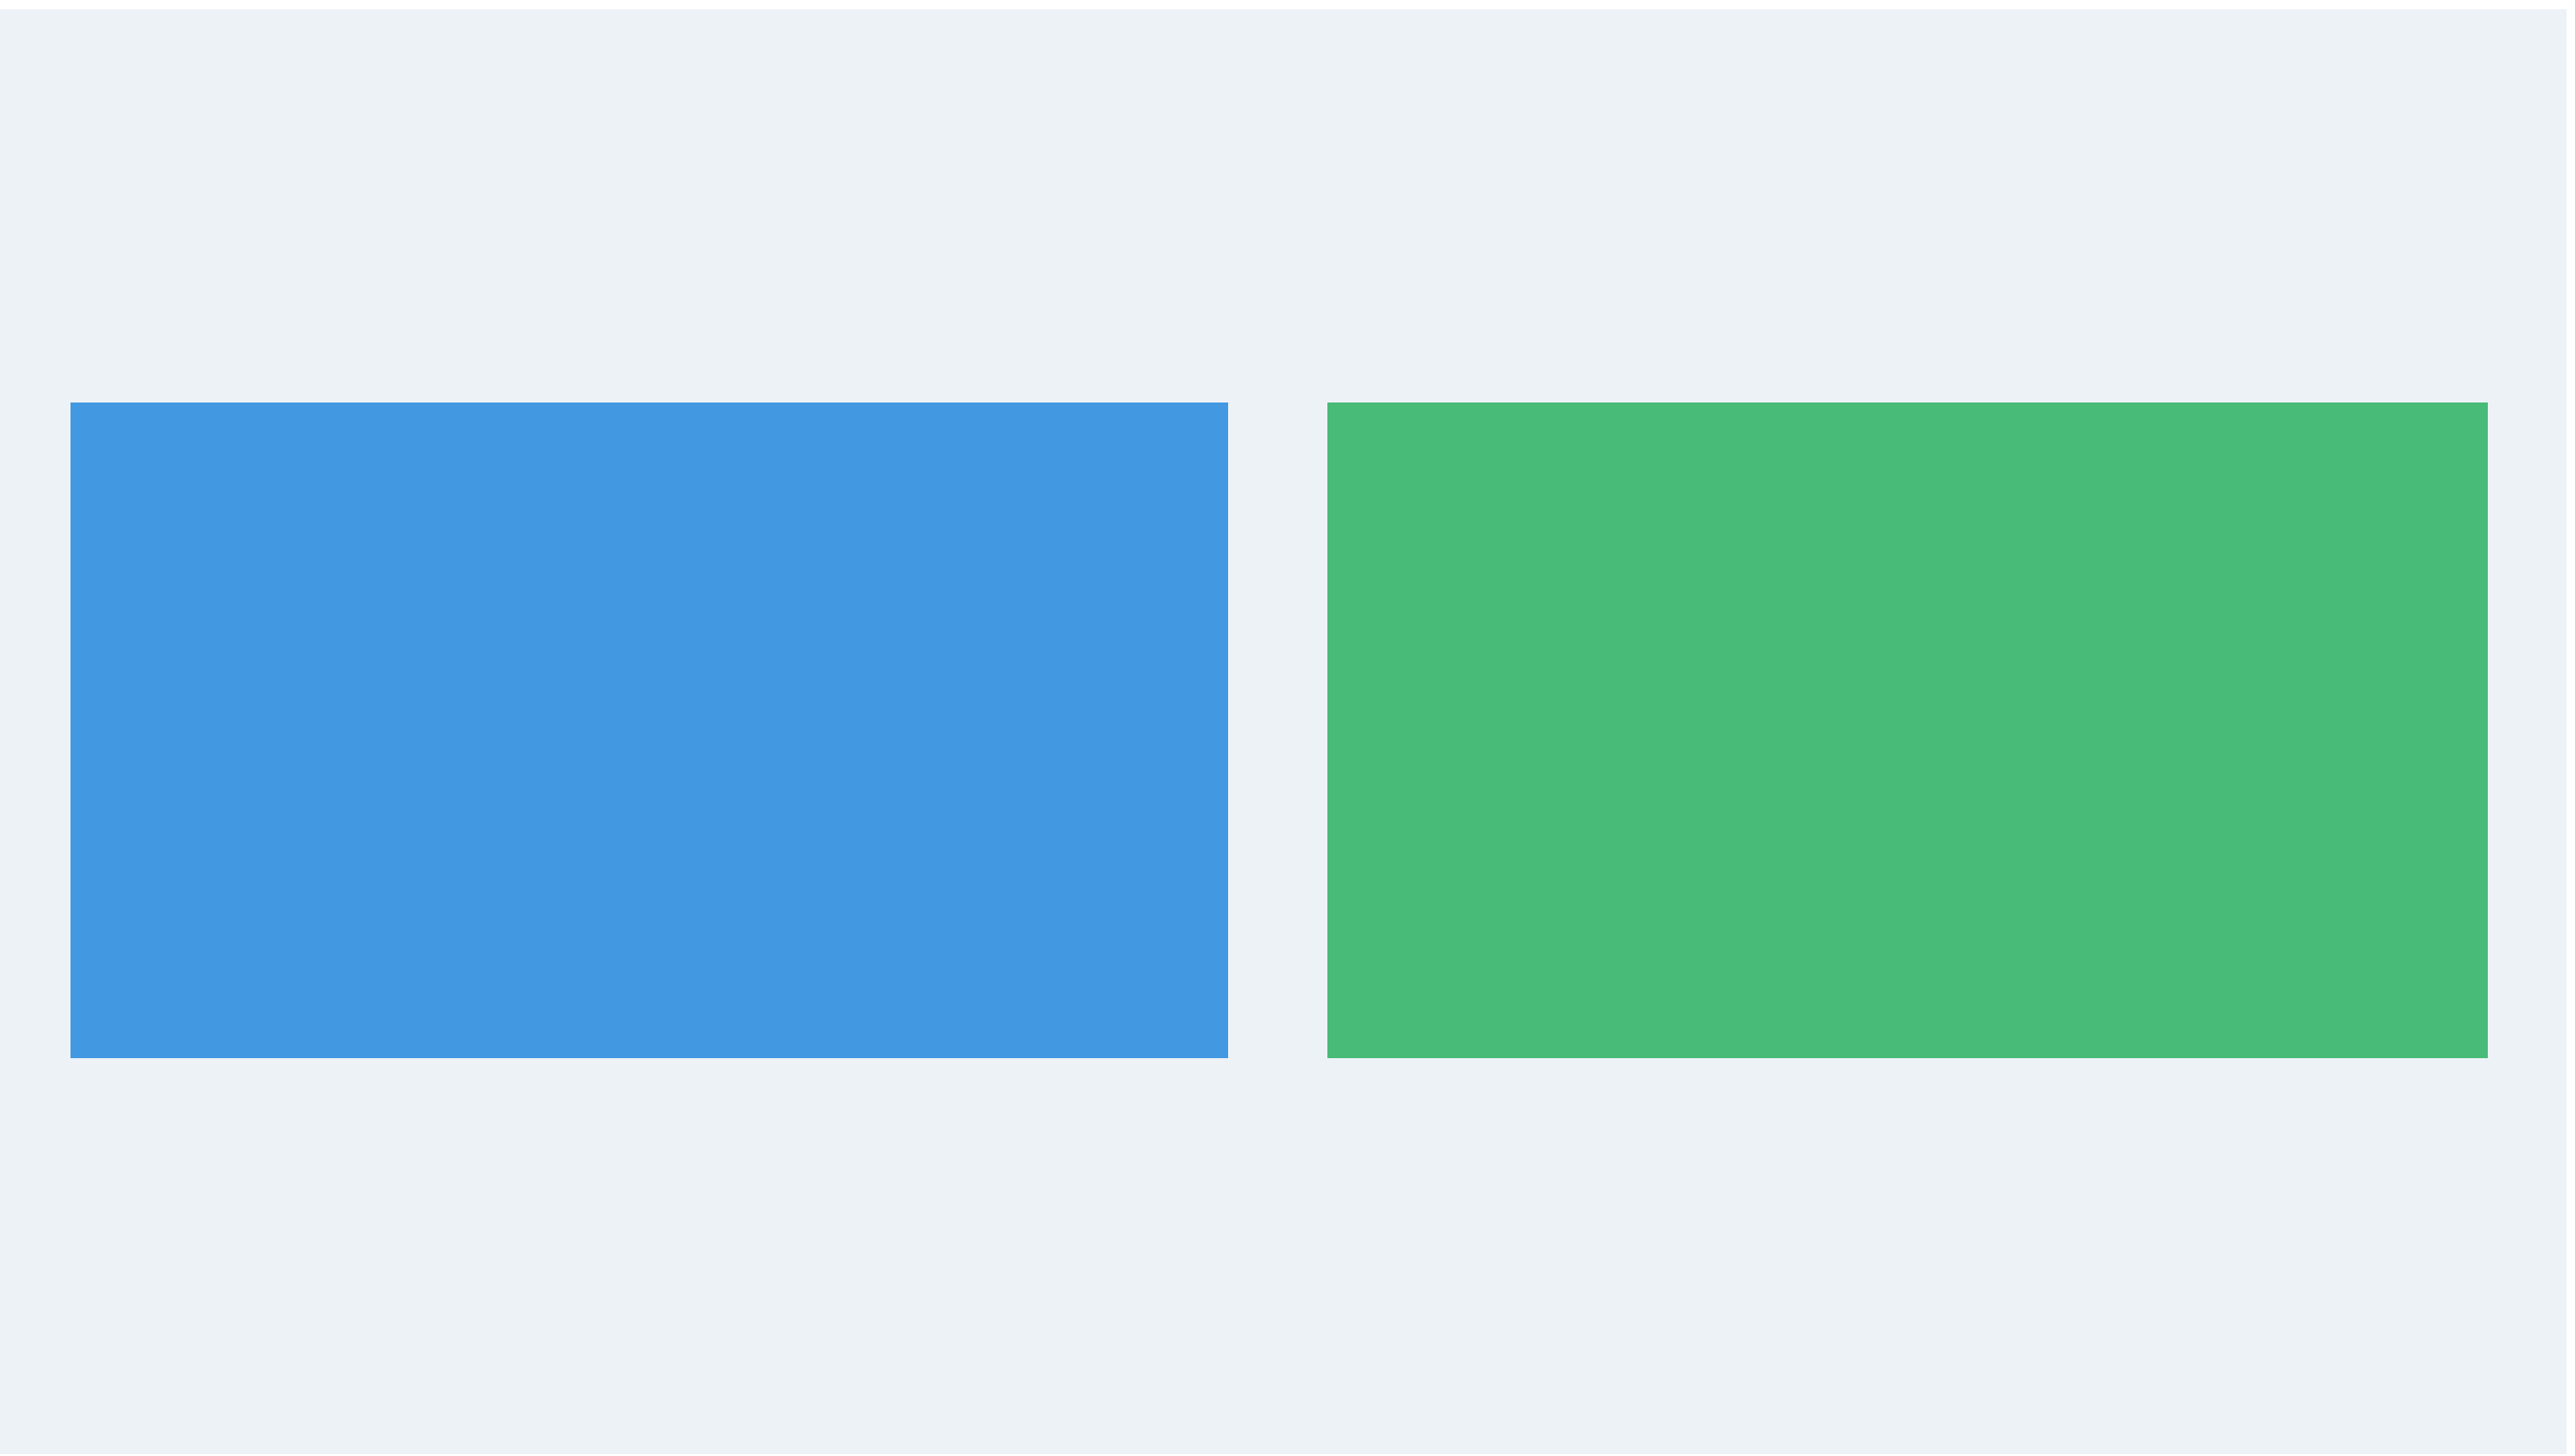

If you spot anything that doesn't work as expected. Get in touch over email and we can figure out where things have went wrong.
